ArteorTM
with NETATMO
SMART HOME MADE EASY

Living Now
WITH
Netatmo

INSTALLATION COMPONENTS

A smart home installation consists of wired products, which can be installed as new or retrofitted as a replacement for existing switches and powerpoints. Wireless switches can then be paired with wired products as shown in this table.

WIRED PRODUCTS

All the products communicate by means of Zigbee radio (2.4 GHz waveband). **Advantage: a dynamic mesh network!**

SMART WIRED PRODUCTS

WIRELESS SWITCHES

WIRELESS SWITCHES

INSTALLATION COMPONENTS

CONNECTED GATEWAY

Install the gateway **close to an internet router** to optimise the Wi-Fi signal reception. The gateway then communicates with individual switches and sockets using Zigbee radio.

Just one gateway is needed per dwelling. It can control up to **100 wired and wireless products**.

There are 2 forms factors for the gateway:

1. A Wall-mount version which can replace a wall plate or outlet (same wiring and mounting centres). It is sold in the Starter kit or Basic kit, together with a wireless master switch.

2. A Din-rail mount version, to be installed inside a load centre or distribution board

The Din-rail version is sold on its own and does not require a wireless master switch (optional).

Wall-mount version

STARTER KIT

Gateway establishes connection between router & other smart products

Unique setup code affixed to the product in order to use the Apple HomeKit app

LED indicator

Din-rail mount version

WIRELESS MASTER SWITCH

Extra-slim, attached to the wall with the adhesive strips provided. It can be repositioned.

It is installed **near the entrance door** to control Home/Away scenarios involving lights, shutters and power outlets.

Sold both in the starter kit and individually, to be added if the house has more than one entrance. Customised scenarios should be identical on all the master switches.

Scenarios should be configured in the Home + Control app.

CR 2032 - 3V button battery supplied
Standby power: 8 years approx.*

*dependent on daily usage.

WIRED PRODUCTS

SMART LIGHT SWITCH

Can **replace an existing switch**, with the same wiring and mounting centres.

Controls all types of conventional and dimmable bulbs, up to 100W for LEDs (or 10 lamps)

SMART DIMMER SWITCH

Can **replace an existing switch**: same wiring, same mounting centres. Requires a neutral (N) wire.

Controls all types of conventional and dimmable bulbs up to 150W.

Always use **dimmable LEDs**.

The dimmer functionality can be activated from the Home + Control app.

SMART LIGHTING MICROMODULE

To be installed near or **directly on the light source**. Used to provide connected lighting.

Controlled by one or more wireless switches and/or bell-press type pushbuttons when replacing a remote switch.

For all types of bulbs **up to 300W** for halogen, 100W for LEDs (or 10 lamps)

LED indicator for installation

Dimensions (with fixing lugs): 52x40x20mm

INSTALLATION COMPONENTS

SMART SHUTTER/BLIND SWITCH

Can **replace an existing switch**: same wiring, same mounting centres. Compatible with **all wired shutter motors** with electronic or mechanical end stop.

SMART SINGLE POWERPOINT - 10A

Can **replace an existing powerpoint**: same wiring, same mounting centres. The Smart powerpoint can measure the instantaneous and total power consumption. It is compatible with all electrical appliances, especially with large household appliances. **Extra built-in protection** in case of overloads of more than 10A.

WIRED PRODUCTS

NIGHT/DAY WIRELESS SWITCH

Extra-slim, attached to the wall with the adhesive strips provided. It can be repositioned. Used to **create scenarios** involving lights, shutters and powerpoints at the time people wake up and go to sleep. Scenarios should be configured in the Home + Control app. CR 2032 - 3V button battery supplied. Standby power: 8 years approx.*

WIRELESS SWITCH

Extra-slim, attached to the wall with the adhesive strips provided. It can be repositioned. Controls smart light or dimmer switches, micromodules and smart powerpoints. CR 2032 - 3V button battery supplied. Standby power: 8 years approx.*

WIRELESS SHUTTER/BLIND SWITCH

Extra-slim, attached to the wall with the adhesive strips provided. It can be repositioned. Controls smart shutter/blind switches and can **centralise** control of several shutters. CR 2032 - 3V button battery supplied. Standby power: 8 years approx.*

*dependent on daily usage.

EXAMPLE SCENARIOS

Below are some examples of scenarios which can be created in the Home + Control app and activated with a single touch. The installed wired products control lights, lamps, electrical appliances and shutters/blinds.

“LEAVE” SCENARIO

Wireless master switch located by the entrance door. Pressing the **bottom button** activates the scenario, which can be customised to suit users' needs in the Home + Control app.

“ARRIVE” SCENARIO

Wireless master switch located by the entrance door. Pressing the **top button** activates the scenario, which can be customised to suit users' needs in the Home + Control app.

“SLEEP” SCENARIO

Night/Day wireless switch located in the parents' bedroom. Pressing the **bottom button** activates the scenario, which can be customised to suit users' needs in the Home + Control app.

“WAKE UP” SCENARIO

Night/Day wireless switch located in the parents' bedroom. Pressing the **top button** activates the scenario, which can be customised to suit users' needs in the Home + Control app.

Push-buttons (up to 5)

STARTING SETUP AND PAIRING

CREATE THE NETWORK*

- 1** After installing and connecting up the wired products, **turn the power back on**. The LEDs on the products **light up with a steady red light**.

- 2** Remove the protective tab from the battery to supply power to the **Wireless master switch**.

- 3** Press on one of the buttons on the **Wireless master switch** in order to activate it. Its LED **flashes green then goes off**. The LED on the **Gateway power outlet** also goes off.

- 4** 1. Move the **Wireless master switch** close to the **Gateway** and **hold the centre** of the switch until its LED briefly lights up green.
2. **Release hold**. The LED goes off.
3. The gateway power outlet LED changes to a steady green light.

One after another, the LEDs on the other wired products change to a **steady green light**.

The network is created.

PAIR WIRELESS SWITCHES

- 1** After creating the network, you can pair wireless switches to control the connected switches and powerpoints. **Remove the protection tab** from the wireless switch you wish to pair, **then go to steps 2, 3 and 4**. Repeat the same operation with each switch, one after another.

- 2** Press briefly at the top or bottom of the switch

- 3** Keep your finger pressed on the top or bottom of the wireless switch, then **tap 3 times** on the product you wish to control.

- 4** 1. The LEDs on both products **flash quickly** (blue) then light up **briefly** (steady blue).
2. The LED on the wireless switch **goes off**, the one on the wired product **reverts to green**.

They have been paired successfully.
Repeat the same operation with each wireless switch, one after another.
The association wireless switch-smart wall device can also be done in the app, once the smart home configuration is completed. (see next steps in page below)

> The association between wireless switches and smart wired products can also be done at a later stage, via the Home+Control app (Settings/ Add product)

IMPORTANT: Once installation is completed, leave the starter kit user guide and product manuals with your customer. The user guide contains a unique code to configure the Apple HomeKit app.

The **Wireless master switch** and **Night/Day** wireless switches are paired via the Home + Control app. For more information, please visit [legrand.com](https://faq.homecontrol.eliotbylegrand.com/question/829) or use the links below.

Wireless master switch:
<https://faq.homecontrol.eliotbylegrand.com/question/829>
Night/day wireless switch:
<https://faq.homecontrol.eliotbylegrand.com/question/828>

SETUP HOME+CONTROL APP

1 DOWNLOAD THE HOME + CONTROL APP

FREE DOWNLOAD

1. Go to **App store** or **Google Play store**.

2. Search **"Legrand Home+Control"**.

3. Download the app.

2 CREATE AN ACCOUNT

1. Launch the **Home+Control app**.

2. Click on **"Sign up"** at the bottom of the screen.

Note: If you already own a Netatmo camera or weather station, or a Bticino Classe 100 Wi-Fi intercom, click on **"Log in"**. Enter the same credentials as used in the app for those products.

3. Enter your Email address.

4. Choose a password meeting all criteria listed. Once logged in, press **"Start"**.

3 SETUP

WHICH GATEWAY IS INSTALLED IN YOUR HOME?

The Gateway with Home/away switch is installed on a wall plate, generally in a central place not far from your internet modem.

The Gateway module is installed inside your electrical load centre or distribution board.

Gateway with Home/Away master switch

OR

Gateway module

Excel Life Smart example shown here. Also applies to Arteor and Living Now with Netatmo

1. Select **"Legrand"** (if you have Excel life Smart or Arteor with Netatmo) or **"Bticino"** (if you have Living Now with Netatmo) then the type of Gateway installed.

2.a

2.b

2. If you have a Gateway with Home/Away master switch: Press and hold the 2 buttons of the remote control (the one with the 2 house icons) until it flashes green then release immediately. See **2.a**.

If you have the Gateway module: Use a pen/small screwdriver to press and hold the front button (recessed black spot) until the front indicator flashes green then release immediately. See **2.b**.

3. Repeat Step 2 again.

4. Choose a name for your smart home. The app will start pairing your Gateway to your Wi-Fi network. Confirm when prompted.

SETUP HOME+CONTROL APP

3 SETUP (continued)

5. Use your camera to scan the **Homekit 8-digit code**

If you have a Wall Gateway: It is at the back of the remote control.
If you have a Gateway module: It is at the front of the Gateway module.

6. Wait for setup to be completed and firmware updates to be downloaded. This can take up to 5-10mins. Click **"Next"**.

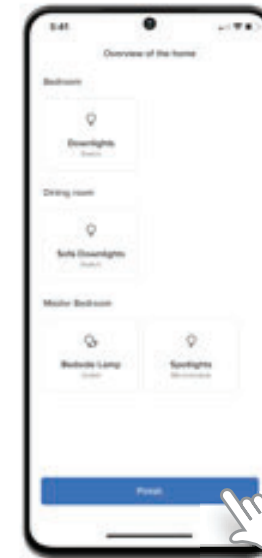

7. Click **"Start"** and go to one of the rooms where your first smart product is located.

8. Select the type of room you are in and click **"Validate"**.

3 SETUP (continued)

13. When all rooms and smart products are allocated, press **"Finish"**. Review your full installation and click **"Finish"**.

14. You can now control your lights and electrical appliances in the main menu. Select the bulb next to the room name to switch ON/OFF all smart products in this room, or select the room name to see each smart product in this room and operate them independently.

TIP: Scenarios and schedules can be operated by selecting the blue circle at the bottom of the screen. They can be customised in the **"Settings menu"**.

4 SHARE YOUR INSTALLATION WITH LOVED ONES AND OTHERS

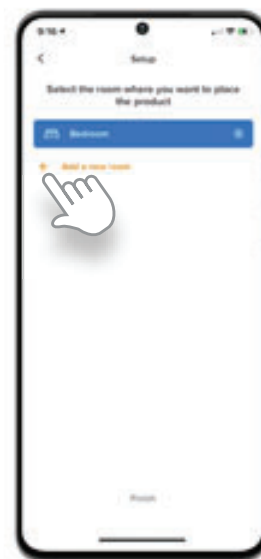

9. **Press** the smart products you want to configure. They will then show up in the app. Click on the product frame to see the details.

10. Rename the products by clicking on the pen symbol.

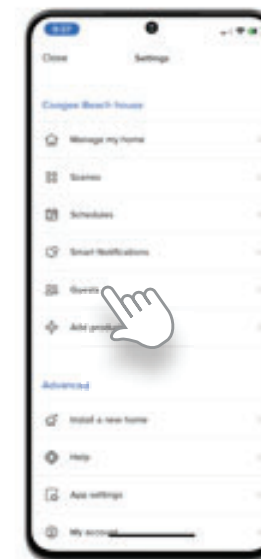

11. Click **"Done"**, once all the products in this room have been detected and renamed.

12. Click **"Add a new room"** and move to the next room where you have smart products installed. Repeat steps 8 to 11.

1. Click on **"Settings"**.

2. Select **"Guests"**.

3. Select the person you want to invite and the digital method to send the invitation. (Email, text message, social chat messages, etc.)

Gateway and Starter kit

MUST BE ORDERED FOR ANY CONNECTED INSTALLATION

STEP 1: Gateway or Starter kit

Used to control your home remotely (lighting and electrical appliances) using a smartphone via the Home + Control App and/or voice control (via a voice assistant). Must be ordered for any connected installation. The individual connected products can be added to the gateway or starter kit. 2.4GHz Wi-Fi connection required.

Pack	Cat No.	Gateway
1	412181	 Used to create a connected installation. - 1 Gateway 240V a.c. Wi-Fi 2.4GHz 802.11 b/g/n Zigbee 2.4GHz to 2.4835GHz. DIN rail mounting. 2 modules DIN.
		Starter kit
		Used to create a connected installation Includes: - 1 Gateway 240V a.c. Wi-Fi 2.4GHz 802.11 b/g/n Zigbee 2.4GHz to 2.4835GHz. Supplied with support frame, grid & plate. - 1 Wireless master switch with preset scenarios which can be customised in the Home + Control App. Supplied with CR2032 3V battery for power supply and 4 removable stickers for wall installation. LED function for low battery indication. Supplied with support frame and coverplate. Zigbee 2.4GHz to 2.4835GHz.

STEP 2: Connected products

067694 574243

Used to complete your connected installation, requires prior installation of a Starter kit cat no. EWNSKIT series or DIN-rail gateway cat no. 412181.

Pack	Cat No.	Wireless switch module ON/OFF
1	067694	 Allows to transform a mechanical 2-way switch into a wireless ON/OFF switch. Small size for easy integration into the wall box. To be paired with one connected switch, micro-module, socket outlet. Supplied with CR2032 3V long-life battery for powersupply.
1	574243	 Smart micromodule Used to provide connected lighting 100W, with neutral. Can be controlled by Home + Control app, smart auxiliary switch, momentary switches or wireless switches. To be installed close to the lighting load. Zigbee 2.4GHz to 2.4835GHz.

574252 412015

Used to complete your connected installation, requires prior installation of a gateway or starter kit.

Pack	Cat No.	Motion sensor
1	574252	 Allows to control up to 20 wired switches, micromodules and socket outlets. Easy pairing by tapping the wired products. Supplied with 2 x AA battery. For indoor and outdoor use. Recommended distance between 2 sensors: 6 m. Recommended installation height: 2.5 m. Time delay adjustable from 1 to 30 min Range: 8 m. Detection angle: 140°. Sensor range adjustable from 2 m to 8 m. Light level threshold adjustable from 1 to 1000 lux.
1	412015	 Energy module for rail mounting Measures the instantaneous and cumulative global electrical consumption of a single phase installation (63A maxi). Sends a notification in case of reaching a configurable limit in the Home + Control App. Delivered with 1 coil. 1 module.
1	067697	 Connected curtain/roller blind micromodule For local and remote control of a 230 V~ roller blind (raise/lower/stop functions and level management). Compatible with roller blinds with mechanical or electronic stop, not compatible with radio-controlled roller blinds. Can be paired with one or more roller blind wireless switches. To be installed in the ceiling box or roller blind box to connect a new or existing roller blind.

		Night/Day wireless switch
1	AWNNDWE	Used to add 2 extra scenarios to a connected installation. Preset Wake up/Sleep scenarios which can be customised in the Home + Control App. Supplied with CR2032 3 V battery for power supply and 4 removable stickers for fixing the control unit on any walls. LED function for low battery indication. Supplied with support frame, and coverplate. Zigbee 2.4GHz to 2.4835GHz.
1	AWNNDGN	○ White
1	AWNNDALU	● Magnesium
1	AWNNDCHP	● Aluminium
1	AWNNDCHP	● Champagne

STEP 1: Starter kit for a connected home

Cat. no.	Gateway
○ K4500C	 This pack enables to create a connected installation in the home. It can be used to control lighting, roller shutters and electrical equipment plugged into connected sockets: - using your smartphone and the Home + Control app - using voice assistants - from the general control at the entrance to your home Supplied with the Home/Away wireless master switch required for the association procedure of all connected devices. Power supply 110-230 V~ - 2 modules
○ K4510C	 Gateway as above. Supplied with the flush-mounted Home/Away wireless master switch 1 module required for the association procedure of all connected devices. Power supply 110-230 VA - 2 modules
○ 412181	 Gateway as above for DIN switchboard. Supplied without wireless In&Out master scenario control item K4570CW. - 2.5 DIN modules.
<div><input type="checkbox"/> KW30M2</div> <div><input type="checkbox"/> KG30M2</div>	Cover required for the gateway 2 modules  Cover for item K4500C in combination with the relative colored cover item KW40M2, KG40M2, and for item K4510C in combination with the relative colored cover item KW40, KG40.
<div><input type="checkbox"/> KW40</div> <div><input type="checkbox"/> KG40</div>	Covers for the gateway scenario control 1 module  Cover for item K4570CWI. (scenario control in the gateway item K4510C)
<div><input type="checkbox"/> KW40M2</div> <div><input type="checkbox"/> KG40M2</div>	2 modules  Cover for item K4570CW. (scenario control in the gateway item K4500C)

STEP 2: Connected products

Devices to be completed with appropriate cover as indicated below.

Cat. no.

○ K4003C

574243

Connected switches and light relay

Connected 2-ways switch. It allows to control lights locally or remotely. The connected 2-ways switch has the same installation and usability of a traditional 2-ways switch and it is compatible with all loads with max power 100 W. It is equipped with a blue LED light used always on for localisation modality or on, when the light is on for the load status modality. It can be associated with "wireless light switches".
Caution: Must be connected to the neutral. Power supply 110-230 V~.

- 1 module

Connected lighting micromodule. It allows to control lights locally or remotely. It is compatible with all loads with max power 100 W. It can be connected to one or more traditional push-button or associated with "wireless light switches". It is installed as a traditional rele in the box (behind the button) or in derivation boxes. Caution: Must be connected to the neutral. Power supply 110-230 V~.

○ K4027CM2

○ 067697

Connected devices for shutters

Connected rolling shutter switch - It allows the control of a shutter locally or remotely. Compatible with all standard rolling shutter motors (with a mechanical or electromechanical stop and max power 500 VA) controlled by a wired shutter switch (switching of the same motor power supply).
Not compatible with motors for radio-controlled or pulse-controlled roller shutters. It can be associated with one or more wireless commands.
Caution: Must be connected to the neutral. Power supply 110-230 V~.

- 1 module

As K4027C

- 2 modules

Connected micromodule for shutters. Associated to one or more shutter wireless controls, it controls a shutter locally or remotely. Compatible with all standard shutter motors (with mechanical or electronic limit switch and maximum power 500 VA), controlled by a wired shutter changeover switch (changeover with the same power supply as the motor).
Not compatible with radio controlled or pulse controlled shutter motors. It can be installed in the existing shutter box with no need of masonry works. Power supply 110-230 V~.

KW01

KW43M2

574252

Devices to be completed with appropriate cover as indicated below.

Cat. no. **Wireless controls for light**

○ K4003CWI

Wireless light switch. It allows the ON/OFF and dimming control of one or more connected devices for the lighting control. It can be installed in any flush-mounted box without any wiring. The battery can be replaced without removing it from the supporting frame. Integrated LED for low battery indication. Powered by battery 3V type CR2032 (supplied) with an autonomy of 8 years - 1 module

○ K4003CW

Wireless light switch. It allows the ON/OFF and dimming control of one or more connected devices for the lighting control. Surface installation with repositionable stickers (supplied) or onto a flush mounting box. Integrated LED for low battery indication. Powered by battery 3V type CR2032 (supplied) with an autonomy of 8 years - 2 modules

○ K4003DCW

Wireless light switch. It is equipped with two buttons to control two different connected devices for lights. Each single button can be associated with one or more devices. Surface installation with repositionable stickers (supplied) or onto a flush mounting box. Integrated LED for low battery indication. Powered by battery 3V type CR2032 (supplied) with an autonomy of 8 years - 2 modules

○ 067694

Wireless module for mechanical switch. It allows to change a 2-way switch or a traditional pushbutton into a wireless light control for ON/OFF control of one or more devices connected for light control. The small size allows the installation in the flush mounted box. CR2032 type 3V power battery with 8 year expected life supplied (as standard).

○ K4027CWI

Wireless controls for shutter

Rolling shutter wireless switch - It allows the control of one or more connected rolling shutter switches. It can be installed in any flush-mounted box without any wiring. The battery can be replaced without removing it from the supporting frame. Integrated LED for low battery indication. Powered by battery 3V type CR2032 (supplied) with an autonomy of 8 years - 1 module

○ K4027CW

Rolling shutter wireless switch - It allows the control of one or more connected rolling shutter switches. Surface installation with repositionable stickers (supplied) or onto a flush mounting box.
