INTEGRATE ADVANCED FUNCTIONS FOR SMART LIVING

Integrate advanced electronic functions into Como, enabling an even stronger independent living offer.

Electronic functions include: no touch switches, skirting lights, movement sensors, USB chargers and emergency safety lighting.

No Touch Switches are activated by waving a hand within 5cm of the switch plate, making it perfect for people with limited hand flexibility. No Touch switches can also be used for auxiliary switching with water taps, doors and other applications.

(Image shown: Cat No.: 572051 + CMAR2MSF + CM910PLWE)

Skirting lights can be customised to offer permanent or movement activated light. Ideal for creating a light path at night to improve visibility and prevent falls.

(Image shown: Cat No.: 572226 + CMAR2MSF + CM910PLWE)

Automatic switches allow lighting to be switched on and off when movement is detected in an area. An ideal hands free solution for a range of spaces.

(Image shown: Cat No.: 572053 + CMAR2MSF + CM910PLWE)

USB Charging module offers a market-leading 2 x 2.4A charging capacity, the fastest available. Charge everything from tablets and phones to fitness bands at their maximum charging speeds. Add them to kitchens, bedrooms, lounge rooms and home offices.

(Image shown: Cat No.: AR770USB2PSAMWE + CMM910/770AWE + CM910SF + CM910PLWE)

Emergency safety lighting. The miniature emergency lighting unit illuminates automatically during a power failure. It can also be detached from the wall to become a hand held torch.
