Inside Legrand Australia & New Zealand

Local manufacturing of over 15,000 products and components.

A dedicated **R&D** team with **over 20 engineers** developing new products.

An **accredited NATA laboratory** to conduct compliance and quality tests.

All products comply to the required
Australian and New Zealand standards
of manufacturing quality and electrical safety.

Local presence, including a network of distributors and contractors for local support – before, during and after sale.

Products & solutions dedicated to the needs of Office buildings

INCREASING ENERGY EFFICIENCY

Our solutions help **improve energy consumption** in commercial buildings. By minimising energy use, certification of a **buildings energy efficiency** and sustainability can be achieved, with independent energy-rating systems such as **NABERS** and **Green Star**.

ENHANCING WORK ENVIRONMENTS

The right lighting ensures a **comfortable work environment** and with added controls to create scenarios which **adapt to different working requirements**, not only makes for a **healthy workplace**, but also has a significant effect on **productivity** and **efficiency**.

REDUCING OPERATIONAL EXPENDITURE

Solutions designed to **monitor and improve the quality** of lighting & electrical systems whilst **lowering energy consumption** and **carbon footprint**, resulting in **reduced operational costs**.

ADAPTABLE AND FLEXIBLE ARCHITECTURE

Nomadic work practices means that businesses need an **adaptable and flexible technical infrastructure**, to integrate electrical equipment and communications networks. We offer electrical and digital architectures which make it **easy to reconfigure** offices and **adapt** them to meet changing requirements.

LEGRAND EXPERTISE

At Legrand Australia and New Zealand, we provide a **dedicated point of contact** to guide you through each stage of your office-building project.

MAKE BUSINESS A PLEASURE BY ENSURING OCCUPANT COMFORT AND BUILDING EFFICIENCY

For building owners and facility managers, reducing the day-to-day operating costs of a building, while maintaining occupant comfort and productivity is a huge challenge. Businesses have recognised that the health and wellbeing of employees is vital for motivated and highly effective staff. When it comes to providing the best in electrical products and systems to create productive and comfortable office spaces, it's far from business as usual with our solutions. Innovatively designed to improve both operational and energy efficiencies, whilst also enhancing employee wellbeing, our products set the benchmark for superior performance.

ENHANCE AESTHETIC APPEAL

Office aesthetics can define the company culture and set the emotional connection with current and potential employees and clients, as well as impact on employee performance. It's important to find a balance between practical function and aesthetic appeal, therefore the design of the office can set the tone for each workday. Office aesthetics can be improved by adding the correct accessories including switches, sockets and other visible details. With our range of Excel Life, Linea and Arteor wiring devices, our products meet all requirements whatever the project.

FUNCTION MEETS AESTHETICS

We are specialists in wiring devices, controls and stylish user interfaces for offices and commercial applications in general. Our sophisticated ranges offer switches, AV and data points, USB chargers, dimmers and fan controllers, powerpoints and room controllers. All ranges are available in exciting colours, finishes and styles, to suit any décor and project – from the boardroom to the entire office building, we have a solution to meet your requirements.

ARTEOR

Arteor is the ultimate collection of beautifully designed switches. Designed in France with meticulous attention to detail, Arteor comes in a choice of 17 luxury finishes to suit any décor.

CREATE AN INTELLIGENT AND COMFORTABLE OFFICE AND IMPROVE OPERATIONAL EFFICIENCY

Whether you want to improve employee comfort and productivity, whilst saving on operational and energy costs, we have smart office solutions for varying levels of integration.

STANDALONE SOLUTIONS FOR BASIC FUNCTION

Our standalone products are designed to meet the highest standards for commercial buildings. The range includes wall switches, powerpoint & audio video sockets, USB chargers, as well as a wide range of sensors – from PIR, microwave, dual-tech, to tri-scan sensors.

Double Powerpoint With Dual USB Charger Type-A Matt Silver

2 Gang Switch

Adjustable Head Microwave Presence Detector

PIR Sensor

BUILDING-WIDE FULLY INTEGRATED CONTROL AND MONITORING

Our solutions are compatible with BMS, allowing Facility Managers to enable building-wide management of the office's operation and increasing the efficiency of the building. The most sophisticated of Legrand's building integration offering is BACnet/IP, aimed at larger buildings. This has been designed to achieve enhanced levels of centralised communication and control. Essentially, the BACnet/IP solution allows seamless integration with third-party systems, that use the same worldwide BACnet/IP protocol.

Building Management System

NETWORKED CONTROL SYSTEMS

Our networked control solutions can help reduce carbon footprint, maintenance and opex costs, while increasing comfort and productivity of building occupants. Our control systems allow individuals to directly control scenes in their work environment to maximize their comfort, whilst also allowing default settings to maximise energy efficiency, automatically adjusting light levels depending on time of day and natural light levels.

We offer innovative, industry-leading solutions from basic room control through to a fully integrated lighting control and monitoring system

Our **SCS** option, which is aimed at small to medium sized office buildings where ease of installation and cost are primary factors. SCS is essentially a control management solution based on Legrand's own proprietary system. Pre-set scenarios such as welcome, good-bye and presentation mode, create a bespoke environment for maximum efficiency in the office. Suitable for new-build and retrofit projects alike, SCS features our premium Arteor range of switches and panels for a stylish and sophisticated finish.

GALAXY™
CONNECTED EMERGENCY
LIGHTING SYSTEM

Our Galaxy Connected Emergency Lighting System ensures full compliance to standards, simplified maintenance and a reduction in installation costs. Controlled via a desktop or smart device, providing the ultimate in user experience, making trouble-shooting and testing user-friendly and simple.

3.5" Multimedia Touchscreen Mirror White

Screen and Volume Control Stainless Steel

SCS

While the SCS solution can utilise an IP module to send monitoring data through to central management software, **KNX**, takes this functionality further and is aimed squarely at larger commercial offices. This solution utilises the KNX protocol, which not only allows full automation of a building or groups of buildings, but also facilitates the integration with other KNX certified systems for more tailored outcomes. For example, KNX supports expanded functionality of switches that deliver different results for short/long/double button presses.

We offer a range of DALI compliant sensors, switches, and scene plates designed for optimum flexibility.

The DALI system of fully networkable devices can now interconnect with all levels of energy management in building spaces, measuring and reducing energy consumption.

TRIUMS LOBBIES & ENTRANCES

First impressions count. This is why modern reception areas place great emphasis not only on an attractive design but also on their functionality. Nothing says more about a company's culture to a potential new employee or an important client, than the lobby and entrance. And it's important to make visitors feel welcome from the moment they enter the building.

LED DOWNLIGHTS

The MR16 Retrofit Downlights offer superior light output, sleek design and carbon emission reduction for your office facility. For a new build office, the DLI Downlight series are ideal, adding a touch of contemporary style, while delivering maximum brightness and are available in a range of finishes – white, brushed chrome and black.

MR16 LED Downlight

DLI Series LED Downlight

DOOR ENTRY SYSTEMS

Businesses can welcome guests and enjoy full, secure control over access to the building. For the exterior entrance, the SFERA NEW unit with its modern, sleek design fits perfectly with any commercial development. The exterior plate combines all the advantages of the 2-wire system with IP system options – a major innovation in terms of aesthetics, function and technology – from basic audio door entry to wide angled cameras with night and day vision.

The Classe 300 Wi-Fi interior unit can be located behind reception, incorporating a wide range of functions: lock / unlock the gate or front building entrance, activate security camera, control lights and act as an intercom system.

BOARDROOMS, MEETING ROOMS & CONFERENCE FACILITIES

Boardrooms, meeting rooms and conference facilities need to be fully equipped to hold successful meetings and corporate events. Intelligent solutions for controlling lighting, window dressings, projector screens as well as audio-visual equipment can ensure meetings run smoothly and are sure to impress clients.

LED LUMINAIRES

Luminess is a soft light luminaire that provides even light distribution on walls and surfaces, while avoiding glare and shadows, improving productivity and work efficiency. For high efficiency and maximum brightness, our DLI range of downlights are ideal.

DLI series comes with a colour-changing option – Warm, Cool and Natural – allowing an array of lighting options that will create a completely different ambience.

Luminess LED Panel

DLI Series LED Downlight

POWERPOINTS

The full modularity of the Arteor range allows for seamless integration into various kinds of installation support devices: floor boxes, columns, mini columns, DLP trunking and multi-outlet desktop extensions or pop-up boxes.

• **Pop-up boxes** can be equipped with Arteor power and data sockets and are suitable for floor and desk installation.

• **DLP trunking** can be fitted with 2 to 8 wiring device modules such as Arteor 2P+E socket, RCBO, RJ45 and AV sockets.

CABLE MANAGEMENT

Floor boxes offer a flawless solution AV electrical power and communications projects

Soluflex is a flexible, modular cable management system. Cables can be installed and run anywhere underneath the flooring.

MULTIMEDIA PANELS

The world of entertainment and computing is becoming more and more demanding. For boardrooms, meeting rooms and function rooms, we offer a range of data, voice, video and audio products that may be required for your important meetings or customer events.

Telephone, Data, Foxtel & TV

Customised Multi-panel

SOCKETS AND USB CHARGERS

We offer a range of power sockets that meet international standards, and RJ45 sockets for reliable access to data networks and the Internet. Our USB power supply is ideal for business travellers to charge their smart phones and tablets, without the restriction of a mobile charger and sockets standards.

OPEN PLAN OFFICE

In the modern workplace where open plan office is the norm, motivating, pleasing and comfortable spaces has a significant effect on productivity and wellbeing of employees. Factors such as temperature, lighting levels, fast access to information, have shown to increase the productivity of employees. To enhance comfort in the workplace, we have developed solutions, allowing the creation of specific scenarios, specially adapted to open-plan offices, thus providing occupants with an attractive and comfortable working environment.

LED LUMINAIRES

Luminess is a soft light luminaire that provides even light distribution on walls and surfaces, while avoiding glare and shadows, improving productivity and work efficiency. For high efficiency and maximum brightness, our DLI range of downlights is ideal.

Luminess LED Panel

DLI Series LED Downlight

POWER OUTLETS AND USB CHARGERS

Ensure workstations are equipped for functionality, ergonomics and comfort with power and data sockets, and the convenience of charging smartphones and tablets without the need for bulky adaptors.

Double Powerpoint With Integrated USB

Multi-outlet Powerpoint

Telephone, Data, Foxtel & TV

4 Outlet Switched Powerboard with Dual USB

CABLE MANAGEMENT

We offer solutions for cable management in open plan offices and workstations.

- **DLP trunking:** Choose from two PVC wall trunking systems - DLP PVC skirting trunking and DLP Plus mini-trunking - that are quick and easy to install with the flexibility to reconfigure when necessary. Can be fitted with two to eight wiring device modules such as Arteor 2P+E socket, RCBO, RJ45 and AV sockets

For stylish and convenient power, data and audio solutions for office workstations, conference rooms and boardrooms, Flexi Board Aluminium trunking can be fitted with Arteor sockets, with up to ten configurations.

SENSORS

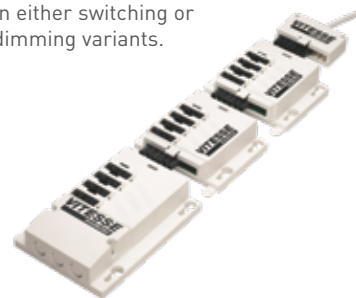

Add motion sensors to manual ON/OFF light switching to automatically turn lights off when sensing no presence. For dimming capabilities, Green Star rating can be achieved for the building when integrating a dimmable sensor.

CP Electronics PIR sensor

LIGHTING CONNECTION SYSTEM

Vitesse Modular is a simple, pluggable solution that can be used in a variety of applications. Its modular design can be easily adapted for layout changes, future connectivity and control requirements. It is available in either switching or dimming variants.

EMERGENCY LIGHTING

Ensure emergency exit lighting is placed visibly in open office areas to aid in emergency situations and the evacuation process.

E2 LED Exit Sign

LED Satellite

BUSBAR TRUNKING

For large open plan spaces, the management of lighting is essential for ensuring both comfort and energy savings. LB PLUS DATA is a busbar trunking system with an internal BUS that can be used for the management of DALI or 1-10V protocol based lighting.

BREAKOUT AREAS

In today's modern office building, having a separate area from the desk or boardroom gives employees an opportunity to avert from their computer screen and to conduct less formal meetings in a relaxed atmosphere.

LED LUMINAIRES

When planning a breakout area, opt for LED lighting with warmer colour temperatures and lower lighting levels to help employees relax and recharge.

NUVO

Add some background music with the Nuvo multi-room audio system for an unparalleled listening experience. Available in both wired and wireless distributed audio solutions specially designed to match incredible fidelity with the latest in streaming source variety and intuitive control.

USB CHARGERS

For convenient charging of mobile devices directly through USB connectivity, allowing staff to re-charge their mobile devices, while re-charging themselves.

Double USB Charger
White

USB Hub Type A+C
Urban Grey

USB Hub
White

For outdoor break-out areas, Charging Stations from Legrand provide an ideal solution for employees and visitors to charge their mobile devices in outdoor spaces. These elegantly designed pedestals include a combination of standard power outlets, USB outlets, and LED lights to illuminate pathways at night.

CORRIDORS, STAIRWELLS & AMENITIES

Our solutions enable you to harness the potential for cost energy savings in communal areas and back-of-house areas where there is low traffic, without compromising on safety and convenience.

SKIRTING LIGHTS

Various lighting options for use in staircases and passageways combine safety with a sophisticated design such as skirting lights with motion detectors, or LED-illuminated DLP trunking lights.

Automatic switch ensures that lights are on only when and as long as they're needed.

Skirting light with motion detector saves energy and also provides enhanced security in staircases and corridors.

The Calla Step Light is an illuminating choice for stairwells or hallways and excels with its impressive IP65 weatherproof rating.

LIGHTING MANAGEMENT SENSORS

Our wide range of switch sensors, comprising of motion and lighting management sensors, are designed to reduce the amount of time lighting is left on unnecessarily, and is useful for passageways and areas of low traffic. Sensors as part of an overall control management system can help reduce energy costs by up to 60%.

Motion sensors are suitable for areas where there is no natural light, such as passageways, public bathrooms, corridors and equipment rooms.

Sensors can be combined with a room controller to manage a number of circuits in passageways, outdoors, damp areas or in work areas with natural light.

EMERGENCY LIGHTING

We offer standalone emergency lighting luminaires as well as addressable wireless solutions. Our E2 Edgelight is perfect for stairwells and corridors and equipped with long-life, low energy LEDs.

E2 Edgelight Exit Sign

LED LIGHTING FIXTURES

We offer a range of LED based luminaires, for areas of low traffic such as passageways and stairwells, and are IP65 rated. Control options are available – standalone emergency and Galaxy Connected Emergency Lighting System.

The WP2 LED Weatherproof Batten is perfect for high humidity areas and has the added benefit of integrated detection.

SOLIROC WEATHERPROOF SWITCHES AND SOCKETS

The premium choice for exposed environments such as bathrooms, gyms and public facilities with an IK10 impact rating and an IP55 weatherproof rating. Not only is Soliroc robust, it's also stylish – a perfect complement to architecturally designed environments.

Weatherproof Switch

Extra Safe Autoswitch Powerpoint

Illuminated Push-button

LUNCHROOMS, KITCHENS & CAFÉS

Ensure lunchrooms and cafés provide a relaxing environment for employees to unwind during break times. Carefully chosen lighting and a sound distribution system help to create a sense of well-being and creates an inviting atmosphere.

LED FILAMENT GLOBES

Add a touch of modern industrial to restaurants and cafés with our filament globes. Great on their own, or complimented with a caged or clear glass shade, filament globes give the perfect warm ambiance needed for a relaxed lunch.

Filament LED globe

NUVO

The Nuvo multi-room audio system guarantees an unparalleled listening experience, with wired and wireless distributed audio solutions specially designed to match incredible fidelity with the latest in streaming source variety and intuitive control.

Nuvo Player and Speakers

PENDANT LIGHTING

Add a wow factor to cafes with our new range of contemporary LED pendant lighting, constructed from die-cast aluminium and available in hip circular, square or cylindrical designs. The warm white light radiated from the pendants creates ambiance and mood that is critical to any dining experience.

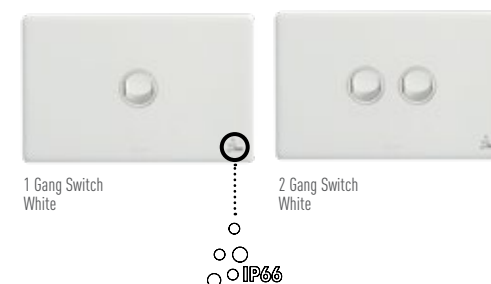

Cersi LED Pendant

Pendi LED Pendant

Cylla LED Pendant

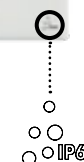

IP66 SWITCHES

Commercial kitchens are very busy areas often prone to moisture. The Excel Life IP66 range of switches is a great solution as they are completely protected against dust and water, ensuring kitchen/cafe staff remain safe during those high busy periods.

1 Gang Switch White

2 Gang Switch White

PARKING AREA

Outdoors is where commitment to the safety of customers and staff begins, and where businesses can demonstrate their environmental commitment.

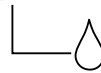

LED LIGHTING

Keep employees and visitors safe with sufficient lighting, and illumination of pathways and access areas. Our luminaires can withstand extreme weather conditions and are IP65 rated. Integrate LED lighting with auto-occupancy sensors to ensure further energy efficiency.

Bulkhead 360 - a robust energy saving outdoor luminaire designed for general security applications.

WP2 LED Weatherproof Battens
- perfect for high humidity areas and all types of environmental conditions.

ACCESS CONTROL

Ensure the safety of staff and guests when entering the office carpark with the Access Control Badge Reader. It can be used either in standalone or centralised mode.

Access Control
Badge Reader

EMERGENCY LIGHTING

We offer standalone emergency lighting luminaires as well as wireless networked solutions. Our range of weatherproof exit signs are ideal for car parks and areas prone to dampness and extreme weather conditions.

Weatherproof Exit Sign

BUSBAR TRUNKING SYSTEM

This integrated system provides both lighting management and power distribution. Combined with the WP2 LED Battens, our LBplus busbar provides full flexibility in creating specific lighting to suit a wide range of applications when adding a DALI option.

Busbars

TECHNICAL ROOM

Service continuity, power distribution, control over energy consumption are important aspects of the operation of any commercial building. Our technical room solutions ensure the safety of staff and visitors, and property is a priority when it comes to energy distribution and operating efficiency.

METERING, MONITORING AND SUPERVISION

EMDX³ meters can be used to display and monitor energy consumption per building, per floor and per application. Our supervision software for energy management and alarm tracking has a user friendly dashboard for monitoring, allows for third-party system integration, can be interfaced with RS 485 and IP, and can be remotely monitored through the internet.

Door-mounted Measuring Unit

Multifunction Metering Unit

Energy Monitoring

BUSBAR TRUNKING SYSTEMS

We offer a complete distribution system from 16A up to 5000A. Whether for transformer-LV panel connections, power supply to lighting units or server racks, busbar trunking offers great flexibility by enabling reconfigurations without any interruptions. The Busbar trunking system is a safe, reliable solution for power distribution.

Busbars

DISTRIBUTION AND PROTECTION

Our protection range of circuit breakers cover all breaking capacities and currents up to 6300A. By ensuring the highest performance levels, they facilitate operation and maintenance, as well as installation upgrades. DPX³ and DMX³ circuit breakers with integrated measurement control provide a genuine response to requirements in terms of safety and energy control.

XL³ Enclosure

Distribution Boards

UPS (UNINTERRUPTIBLE POWER SUPPLY)

The UPS range helps to reduce electricity consumption. They also improve the overall installation efficiency, reaching 99% in ECO mode and 95% in Online mode.

Modular UPS

ENERGY QUALITY

Our range of capacitor banks and harmonic filters compensate for the reactive energy and mitigate harmonic currents, limiting potential damage in the protection chain by improving quality of the main electrical supply. They lower energy costs and have a positive impact on the environment by contributing to energy efficiency.
